(54) Title: MAGNETIC ENRICHMENT METHOD, A REACTOR UNIT FOR MICRO PARTICLES AND A MAGNET UNIT

(57) Abstract: Magnetic enrichment method, wherein  
the desired biological component is collected from a so-  
lution, which component is thereafter enriched in a liquid  
in such a manner that by means of the micro particles at-  
tached to the magnet or attached by means of at least one  
magnet at least one biological component is collected in  
a closed reactor vessel. Thereafter at least one biological  
component is enriched in such a manner that the desired  
component is released to the solution. The reactor unit  
is a closed vessel, wherein the prevailing conditions are  
controllable. The shape and the location of the magnet  
unit in the reactor unit are adjusted in a preferable man-  
ner to collect the desired biological component.
